

Santa Clara Valley Water District Qualifying Products List
 Dedicated Landscape Meter, Flow Sensor, Hydrometer

The following list contains Flow Sensors and Hydrometers that are eligible for a rebate for residential or commercial sites. Commercial sites can also qualify for a rebate for installing a Dedicated Landscape Meter, which is installed and read by the sites water retailer specifically. Flow Sensors and Hydrometers (which contain a flow sensing element) save water by monitoring the flow of water through an irrigation system and sending an alert when the flow is too low or too high. Flow Sensors and Hydrometers must be tied into a compatible irrigation controller to qualify. To inquire about the eligibility of a Flow Sensor or Hydrometer not found on the list, please contact the Water Conservation Hotline at (408) 630-2554.
